### Carbon Monoxide and Smoke Detector/Alarm Disclosure

Executive Law §378(5-a) (commonly known as Amanda’s Law) requires that every one- or two-family dwelling, dwellings located in a condominium or cooperative and apartments in a multiple dwelling, where the dwelling unit has appliances, devices or systems that may emit carbon monoxide or that have an attached garage, shall have installed an operable carbon monoxide detector. Carbon monoxide alarms must be listed and labeled as complying with UL 2034 or CAN/CSA 6.19 and installed in accordance with the manufacturer’s installation instructions.

Executive Law §378(5-b) requires that every one- or two-family dwelling and dwellings located in a condominium or cooperative shall have installed an operable single station smoke detecting alarm. The alarm must be installed in an area so that it is clearly audible in each bedroom or other sleeping area, with intervening doors closed. Upon conveyance of any real property containing a one- or two-family dwelling or condominium or cooperative apartment used as a residence, the grantor shall deliver to the grantee at the time of conveyance an affidavit indicating that the grantor is in compliance. The grantee shall have ten days from the date of conveyance to notify the grantor if the alarm(s) is not operable. Upon such notification, the grantor shall bear any cost of compliance. General Business Law §399-ccc provides that all solely battery operated smoke alarms sold after April 1, 2019 shall employ a non-removable, non-replaceable battery that powers the alarm for a minimum of ten years. This requirement does not apply to a smoke alarm that receives its power from the electrical system of the home.

### Disclosure Regarding Oil, Gas, Mineral and Timber Rights

The owner of real property has a variety of rights that can convey with property when the property is sold to another. These rights include surface rights (the rights to build or plant crops upon the ground) and certain subsurface rights (the right to extract materials from below the ground). Among the various subsurface rights, are the rights to explore for, and remove oil, gas and various minerals such as coal, sand and gravel.

Surface and subsurface rights are often transferred together; however these rights can transfer separately. Despite the best intention of Sellers, property owners are often not aware of the extent of the oil, gas and mineral rights they may or may not own. Determining who owns the various rights to oil, gas and minerals can be complex and should only be done by an attorney and/or title company with expertise in this area. Purchasers of real property are strongly encouraged to have their rights to oil, gas and minerals examined before moving forward with a purchase and sale agreement.
