Disclosure Regarding Oil, Gas, Mineral and Timber Rights

The owner of real property has a variety of rights that can convey with property when the property is sold to another. These rights include surface rights (the rights to build or plant crops upon the ground) and certain subsurface rights (the right to extract materials from below the ground). Among the various subsurface rights, are the rights to explore for, and remove oil, gas and various minerals such as coal, sand and gravel.

Surface and subsurface rights are often transferred together; however these rights can transfer separately. Despite the best intention of Sellers, property owners are often not aware of the extent of the oil, gas and mineral rights they may or may not own. Determining who owns the various rights to oil, gas and minerals can be complex and should only be done by an attorney and/or title company with expertise in this area. Purchasers of real property are strongly encouraged to have their rights to oil, gas and minerals examined before moving forward with a purchase and sale agreement.
