water is turned off at the meter due to no one living in the house and the frost free hydrant needed repaired. Gas, Electric and water will be turned off for inspections

Page 2 of 7 #14: fireplace has a crack and professional said it was ok to burn gas but not wood.
#40 page 2 of 7 Pop off valve on hot water tank leaks some and it drains to the drain but you might want to take a look at that

The water hydrant to the east of the front door is leaking and I will call a plumber to have it repaired.

See reports

Item # 11 : fireplace has a crack and professional said it was ok to burn gas but not wood.

Page 3 of 7:

14 there are normal cracks and or settling for the age of the home. Bottom row of brick on front of house on both sides of the garage doors some flaking brick but does seem to affect the structural condition, might be from water standing in driveway. I did re-pour some concrete at the entrance door to make the opening accessible for wheelchairs

Soffit in the corner west of front door and east side of garage has wood rot and should be repaired. It may or may not be repaired by seller.

Corner cabinet in kitchen that rotates was removed to repair plumbing from and exterior hydrant. That has not been repaired and I would like to have to repair that.

Cold air return vent cover has been removed and need a new grate.

The original HVAC had vents in the slab a previous owner to me removed those and installed new duct work in the ceiling. Old vents have been filled with concrete.

Vent eve above the garage has some bird damage and pushed the vent in about an inch. I may or may not get that repaired.

The window air conditioner in the garage does not work and will not be replaced. The window air conditioner in the shop does not work and will not be replaced.

In my opinion it's a well-built home that has 2 x 6 exterior walls and is easy to heat and cool. Home is not new and I don't know the age of the HVAC unit. I don't know how old hot water tank is.
