

UNITED STATES OF AMERICA
(DEED BOOK 1, PAGE 186)

- Restrictions
- Lots 4, 14, 16, 33, 58 are approved for the installation and duplication of conventional subsurface sewage disposal systems to serve a maximum house size of (1) one bedroom.
 - Lots 5, 15, 17, 30, 30A, 46, 59, 70 are approved for the installation and duplication of conventional subsurface sewage disposal systems to serve a maximum house size of (2) two bedrooms.
 - Lots 1, 2, 6 thru 11, 14 thru 24, 31, 32, 34 thru 45, 47 thru 57, 59 thru 63, and 71 are approved for the installation and duplication of conventional subsurface sewage disposal systems to serve a maximum house size of (3) three bedrooms.
 - Some lots may require pump systems to transfer effluent tank effluent to areas of the lot with suitable soil conditions for disposal.
 - Stippling on some lots represents an area reserved for the installation of the primary and duplicate subsurface sewage disposal systems and shall be used for no other purpose such as house location, other structure location, buried utilities, driveway, swimming pool, etc., or which would conflict with the REGULATIONS TO GOVERN SUBSURFACE SEWAGE DISPOSAL in Tennessee. Modification of the stippled area may be considered, provided sufficient shaded area is maintained.
 - Lots 1 thru 71 are approved for use with utility water only.
 - All underground utilities and driveways must enter along the property lines.
 - The size (number of square feet), design and location of the proposed dwelling may further restrict the maximum number of bedrooms for which a permit may be issued.

Approval is hereby granted for lots 1 thru 71 defined as Big Hollow Estates, Phase One, Pickett County, Tennessee as being suitable for subsurface disposal (SSD) with the listed or attached restrictions.

Prior to any construction of a structure, mobile or permanent, the plans for the exact house/structure location must be approved and an SSD system permit issued by the Division of Ground Water Protection. Water taps, water lines, underground utilities, and driveways should be located at site property lines unless otherwise noted.

Susan M. Williams, Esq., 4/21/94
Environmental Specialist
Division of Ground Water Protection
